Preliminary lectures program

DSE 2026 : Program				
From	To		Topic	Le
Monday, 3 August				
9:00	10:30	Lecture 1	Introduction to dynamic structural econometrics	Robert A. M
10:45	12:15	Lecture 2	Structural estimation of dynamic discrete choice models (NFXP and MPEC)	Bertel Schj
12:15	13:15	Lunch		
13:15	14:45	Lecture 3	Doubly nested fixed point algorithm for estimation of equilibrium models	Bertel Schj
15:00	16:30	Lecture 4	Conditional independence, the inversion theorem, unobserved heterogeneity and finite dependence	Robert A. M
17:00	19:30	Social		
Tuesday, 4 August				
9:00	10:30	Lecture 5	Dynamic models of executive compensation	Robert A. M
10:45	12:15	Lecture 6	Method of simulation moments	Toni Whitec
12:15	13:15	Lunch		
13:15	14:45	Lecture 7	Applications of MSM estimation in finance	Toni Whitec
15:00	16:30	Lecture 8	Dynamic models in banking	Dean Corb

16:45	18:15	Lab	Practicum	TBA
-------	-------	-----	-----------	-----

Wednesday 5 and Thursday 6 August

Conference program

Friday, 7 August

9:00	10:30	Lecture 9	Demand estimation in banking models	Mark Egan
10:45	12:15	Lecture 10	Household finance	Sylvain Ca
12:15	13:15	Lunch		
13:15	14:45	Lecture 11	Dynamic programming of mergers and acquisitions	Yufeng Wu
15:00	16:30	Lecture 12	Dynamic games of network competition	Victor Agui

Saturday, 8 August

9:00	10:30	Lecture 13	Endogenous grid point methods (EGM and DCEGM)	Bertel Schj
10:45	12:15	Lecture 14	Sequential estimation of dynamic discrete games (NPL)	Victor Agui
12:15	13:15	Lunch		
13:15	14:45	Lecture 15	Identification and estimation of non-equilibrium beliefs in games	Victor Agui
15:00	16:30	Lecture 16	Directional dynamic games with multiple equilibria	Bertel Schj
